

SPECIFICATION

40FT Dropside semi trailer	
Feature:	Carry 1X20FT、1X40FT、 or 2X20FT container Carry bulk cargo
Dimension(L*W*H):	12420*2480*2370mm
Height of side wall	800 mm
Main frame:	Heavy duty and extra durability design; Opting for high tensible low carbon alloy Q345B steel; I beam welded by automotive arc-submerge process
Model:	XMS9380TP
No. of axle:	3
Payload(kgs):	40000
Tare weight(kgs):	7800
Kingpin:	Bolt-in type 3.5" or 2"
Landing gear:	Two-speed manual operation 19"
Tire size:	12R22.5 (13 sets)
Rim size:	9.00*22.5(13 sets)
Axle:	3 Axle, 13 Tons
Suspension	Spring suspension with 8pcs of leaf spring
Brake system:	Dual line with Re-6 emergency relay valve, T30/30 air chamber, 46L air tank
Electric system:	One unit of 24V 7-pin ISO standard socket; with brake light, turn light, reverse light, side light, reflector, fog light; one set of 6-pin standard cable
Container locks	12(for 1x20GP,2X20GP,1X40HQ)
Painting:	Two coat of anti-corrosion prime; one coat of finish painting
Accessory:	One tool box; one set of standard tool

Advantages

1. The structure of flatbed semi-trailer is made of high-strength international steel; it has light dead weight, and it has good advantage in anti-distortion, anti-seismic, anti-turbulence, and meets the needs of different road bearing capacity.
2. The web height of flatbed trailer is from 400mm to 550mm, the longitudinal beam is welded by automatic submerged arc welding, the frame is shot peening, and the beam penetrates the longitudinal beam and welds the whole.
3. Tandem dry plate spring and suspension bearing composition, reasonable structure, with strong rigidity and strength, used to support the load slow impact.
